

# The Consortium

1 (Coordinator) Ophir Flomenbom, OF,  
[Flomenbom-BPS Ltd](#) (36 PM)  
Israel

\*\*\* main work in the project: chief director, model's development.  
\*\*\* main reason: developed the basic society-deciders model.

Page | 1

2 [GülNAL COBAN, GUC](#)  
[DOKUZ EYLUL UNIVERSITESI](#) (36 PM)  
Turkey

\*\*\* main work in the project: all activities involving the questionnaire.  
\*\*\* main reason: experts in face to face questionnaires & surveys.

3 Jose Vila, JV  
[Lineex, Valencia](#) (36 PM)  
Spain

\*\*\* main work in the project: all activities involving the behavioural socioeconomic experiments.  
\*\*\* main reason: experts in behavioural socioeconomic experiments.

4 [Yingjie Yang, YEY](#)  
De Montfort University (23 PM)  
UNITED KINGDOM

\*\*\* main work in the project: model's development.  
\*\*\* main reason: expert in models with fluctuating coefficients.

5 Alexis Violaris, AV  
[stratagem Energy Ltd](#) (9 PM)  
Cyprus

\*\*\* the main work in the project: creating the website in Cyprus & arranging citizens' activities in the website & beyond that advance fairness.  
\*\*\* The main reason: they are very active & communicate with citizens & policy makers about socioeconomic matters in Cyprus.

6 [Katharina Götsch, GO](#)  
[University of Vienna](#) (36 PM)  
Austria

\*\*\* main work in the project: development of online eGovernance applications, & model's development.

\*\*\* main reason: world experts on eGovernance.

**7 Karin Rainer, KR**

Agency for European integration and economic development (36PM),

Austria

\*\*\* main work in the project: management.

\*\*\* main reason: the most very active socioeconomic organization in the world.

**8 Eglis Ginters, EG**

Sociotechnical Systems Engineering Institute (72PM),

Latvia

\*\*\* main work in the project: development of online eGovernance applications, & model's development.

\*\*\* main reason: eGovernance world experts.

**9 Maja Brkusanin, CY**

CESIE (9PM)

Italy

\*\*\* the main work in the project: creating the website in Italy & arranging citizens' activities in the website & beyond that advance fairness in nations.

\*\*\* main reason: the most very serious socioeconomic organization in Italy.

**10 Yi Wang, YW**

University of Manchester (9PM)

UNITED KINGDOM

\*\*\* the main work in the project: creating the website in united kingdom & arranging citizens' activities in the website & beyond that advance fairness.

\*\*\* main reason: the lab's activities in sociology & management will help advancing the fairness's website in UNITED KINGDOM.

**11 Iulia Iatco, IIC**

DAS Foundation (9PM)

Moldova

\*\*\* Main work in the project: creating the website in Moldova & arranging citizens' activities in the website & beyond that advance fairness in nations.

\*\*\* main reason: the most very active socioeconomic organization in Moldova.

\*\*\* 2,6,7,9,11: female participants.

\*\*\* 1,5,7,9,11: companies & organizations.

\*\*\* 2,3,4,6,8: state scientific institutes.

## FAIRNESS IN NATIONS

In Western democracies & worldwide, recent years caused the public distrusts the “system”. The stock exchange just tripled from the 2008 collapse, yet the economical crisis continues and most public are worse off. How can we solve the problems while taking into account *fairness in nations*? Here, we collaborate 11 groups from various complementary areas aiming at making the required breakthroughs in answering these questions, while focusing on the ways that the socioeconomic top percentile (1%) obtained its wealth as the source for the problems. Rather than socialism versus capitalism, we will check in this project whether the top percentile wealth is a not-just-biases -signature, or rather the result of a free economy based just on abilities & the global connectivity. We will check with the most advanced methods in socioeconomics, various that we will develop here, what are the ways that can advance fairness in nations. We will compare these with the basic idea about “success based on abilities and contributions” yet also “free economy”.

**1:** we will develop a dynamical society-deciders model and various variants that can explain the socio economic stability yet also fairness in a nation. We will yet also check the effect of the world on each specific nation’s *fairness* in any duration. Special consideration will be put on European nations.

**2:** In deriving any serious solution, we must communicate with citizens. We therefore will conduct in this project various experiments (involving the fields, research about learning and behavioral socioeconomics) about the way citizens view and react during the time to the socio economic occurrences in their nation.

**3:** eGovernance, where citizens create policies, must appear in the solution. We will therefore further develop relevant applications, here with the focus on increasing *fairness* in nations. We will invest efforts in communicating with policy makers, scientists and citizens, advancing application derived policies.
